- ▲ C#, ASP.NET
- ▲ Web API Development
- ▲ MS SQL Server, MySQL
- ▲ PHP
- ▲ .Net Maui Mobile
- ▲ Git & Bitbucket
- ▲ CLI and PowerShell

UI /Design

- ▲ Figma ,Canva

DevOps & Cloud Infrastructure

- ▲ Azure Virtual Machines & App Services
- ▲ Storage & Networking
- ▲ Identity, Security and Governance
- ▲ Monitoring & Log Analytics
- ▲ Azure Load Balancer
- ▲ Disaster Recovery
- ▲ Web Application Firewall
- ▲ Container Fundamentals (Docker)
- ▲ CI/CD Concepts
- ▲ Git & Version Control
- ▲ Release & Deployment Management

Automation and AI Integration

- ▲ Workflow Automation
- ▲ API integration and Webhook
- ▲ AI Agent Integration (OpenAI, Ollama etc.)
- ▲ Automated Notifications & Messaging

WORK EXPERIENCE

Jyosna Inc. Web Developer & Cloud Architect	2022- Present
---	---------------

- Development

- Develop and maintain web applications using C# .NET (ASP.NET Web forms).

- Design and manage MS SQL databases, including stored procedures and performance optimization.
- Implement RESTful APIs and integrate third-party services.
- **Feature Development and Maintenance**
 - Develop new features and improve existing functionality.
 - Optimize performance and fix bugs for a seamless user experience.
 - Collaborate with teams to implement best practices in web development.
- **Feature Development and Maintenance**
 - Develop new features and improve existing functionality.
 - Optimize performance and fix bugs for a seamless user experience.
- **UI/UX Prototyping**
 - Design user interfaces and experiences using Figma.
 - Edit and enhance graphics using Photoshop and Canva.

IT Support Intern | Holy Cross College

2022

- Provided comprehensive IT support by installing and troubleshooting software and hardware.
- Resolved system issues to ensure smooth and uninterrupted operations.
- Maintained and managed databases with a strong focus on data integrity and performance.
- Conducted routine system maintenance to prevent technical problems and ensure reliability.
- Addressed technical issues promptly to minimize downtime and maintain operational efficiency.

PROJECT EXPERIENCE

- **Curfew E-pass Management System**
 - A web-based system designed to automate the issuance and verification of electronic travel passes during curfew restrictions, enabling authorities to manage approvals efficiently and track authorized movements securely.
- **Moviety**
 - An interactive movie information platform that allows users to browse, search, and view movie details, including ratings and trailers, using real-time data from third-party APIs.
- **Alex AI**
 - An AI-powered chatbot application built to simulate human like conversations, answer user queries, and perform basic automation tasks through natural language processing.
- **Automation (n8n)**
 - A Built automated workflows in **n8n** using **AI, CRM, Telegram, Gmail, Webhooks, and Google Sheets** to streamline operations, automate repetitive tasks, manage leads, synchronize data, and deliver real-time notifications.
